Downer
Relationships creating success

Decades of experience of owning and operating one of the country's largest and most diverse fleets – including some of the biggest and best mobile plant in the Australian mining industry – enable Downer Mining to offer full maintenance solutions that are second to none.

By actively monitoring and employing advances in equipment technology and operating and maintenance practices, we can provide our clients with maximum reliability and the lowest-cost solution to their mining requirements. Our strong, cooperative relationships with OEMs mean that we always have access to the latest equipment and information.

Consistent, safe and effective equipment performance is ensured through our centralised plant management system and the use of AMT, the world's leading asset management software for mining equipment.

INNOVATION

We recognise that innovation can save downtime, dollars... and lives. That's why we're always looking for smarter ways to do things. For example, our Remote Grease Pressure Release System uses a garage-door-style remote control mechanism to release pressure in hydraulically and pneumatically operated grease systems, thereby eliminating the risk of grease injection injuries and increasing productivity.

VALUES-DRIVEN CULTURE

We believe that our longevity and stable client base can be largely attributed to the values that guide the way we do business. These include:

ZERO HARM

An overriding commitment to working safely, taking care of each other and preserving the environment.

INTEGRITY AND ETHICAL BEHAVIOUR

Being fair, honest, reliable and professional in all that we do.

COOPERATION AND TEAMWORK

Working effectively with all stakeholders to deliver superior outcomes.

VALUE CREATION AND CLIENT RELATIONSHIPS

A clear focus on creating shareholder value and exceeding client expectations.

OUR PEOPLE ARE OUR ADVANTAGE

Investing in individual development, and providing recognition, encouragement and direction through positive leadership.

INNOVATION

A willingness to challenge conventional thinking and a passion to inspire positive change.

COMPREHENSIVE ASSET MANAGEMENT CAPABILITIES

We have a proven track record in providing:

- Fleet reliability engineering
- Condition-based maintenance practices
- Condition monitoring
- Maintenance of ultra class equipment
- Dry and wet fleet hire, fully maintained
- Maintenance labour hire
- Lifecycle costing
- Input into equipment evaluation and selection
- Earthmover tyre maintenance and management (through our subsidiary Otraco)
- Regional maintenance facilities – Perth and Mackay
- Budgeting and forecasting
- Management of mobilisation and demobilisation of mining fleets.

We offer a fully integrated maintenance management service provided by a highly experienced team.

Experience with ultra class excavators and trucks.

COMMITMENT TO ZERO HARM

At Downer Mining we are committed to a goal of Zero Harm to our people. By combining the considerable asset management experience of our senior management team with the risk management approach of our proprietary Integrated Management System (IMS), we ensure that safety comes first in all that we do.

The IMS is externally certified to AS/NZS 4801:2001, BS OHSAS 18001:2007, ISO 14001:2004 and ISO 9001:2008.
