DSRRC	Downer Sustainable Road Resource Centre
EIS	Environmental Impact Statement
EP&A Act	<i>Environmental Planning and Assessment Act 1979</i>
EPL	Environment Protection Licence issued under the POEO Act
IA	Independent Audit
IAPAR	Independent Audit Post Approval Requirements
LTEMP	Long Term Environmental Management Plan
OEMP	Operational Environmental Management Plan
the Project	The Development approved under SSD 10459
POEO	<i>Protection of the Environment Operations 1997</i>
RAP	Reclaimed Asphalt Pavement
RtS	Response to Submissions
SSD	State Significant Development

EXECUTIVE SUMMARY

State significant development (SSD) 10459 provides for the development of a 35ha industrial subdivision over three stages (Stages 1, 2 and 3) known as the Central Sydney Industrial Estate (CSIE) on the site of the former Shell Clyde Refinery, and the construction and operation of a combined Downer Sustainable Road Resource Centre (DSRRC) in the Stage 1 area of the CSIE (the Development or the Project). The Development is located at 9 Devon Street, Rosehill (the site), in the Parramatta local government area (LGA).

The consent for SSD-10459 was granted by the delegate of the Minister for Planning and Public Spaces on the 31 January 2021. SSC-10459 was modified on the 19 November 2021 by the Department of Planning and Environment (the Department) to amend the approved stormwater management system for Proposed Lots 51-55 (Mod-1) (noting that Mod-1 does not relate to the DSRRC (on Lot 6)).

Subdivision works and activities under SSD-10459 comprising the staged industrial subdivision to create the CSIE are undertaken by VE Property Pty Ltd (the Applicant for SSD-10459) and are not the subject of this audit. The DSRRC, constructed and operated by Downer in the newly created Lot 6 DP1271928 in the Stage 1 area of CSIE, is the subject of this audit. The DSRRC was operational at the time of the audit, therefore the audit covers the operational phase of the DSRRC and those construction elements of the DSRRC that could be assessed on a desktop review.

Conditions of Consent (CoC) C16 – C17 of Schedule 2 of SSD-10459 set out the requirements for undertaking Independent Audits of the Development. The objective of this Independent Audit is to satisfy SSD-10459 Schedule 2, CoC C16, which states:

Within one year of the commencement of operations of the DSRRC, and every three years after, unless the Planning Secretary directs otherwise, the Applicant must commission and pay the full cost of an Independent Environmental Audit (Audit) of the development. Audits must:

(a) be prepared in accordance with the Independent Audit Post Approval Requirements (Department 2020)

(b) be led and conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Planning Secretary; and

(c) be submitted to the satisfaction of the Planning Secretary within three months of commissioning the Audit (or within another timeframe agreed by the Planning Secretary).

This Audit Report presents the findings from the first Independent Audit under CoC C16 covering the first 14 months of operations of the DSRRC, from 12 May 2022 to 20 July 2023 (the audit period). The Independent Audit was completed to fulfill the requirements of CoC C16 and to verify compliance with the relevant CoCs and assess the effectiveness of environmental management on the Project.

The DSRRC, as approved under SSD-10459, includes the construction and operation of an Asphalt Plant, a Reclaimed Asphalt Pavement (RAP) Facility, a Bitumen Products Facility and a Reconomy Facility as part of the DSRRC. The DSRRC site has been in operation with the Asphalt

Plant and the Reconomy Facility since 11 May 2022 when the EPA issued Downer with an Environment Protection Licence (EPL) (21611) for those facilities. On the 30 June 2022 an EPL variation was issued which allowed Downer to commence operations of the RAP facility on the 30 June 2022. The Bitumen Products Facility approved under SSD-10459 has not been constructed and is not scheduled to be constructed at this point in time.

The overall outcome of the Independent Audit was positive. Compliance records were organised and available at the time of the site inspection and interviews with Downer project personnel. Relevant environmental and compliance monitoring records were being collected and reported as required to provide verification of compliance to statutory requirements and the DSRRC environmental requirements. The audit findings were of an administrative nature. In summary:

- There were 111 CoCs assessed.
- Three (3) non-compliances were identified. These relate to notification of non-compliances to the Department, timing of first independent audit and project website content.
- 76 CoCs were considered by the Auditor to be compliant.
- 32 CoCs were considered by the Auditor to be not triggered.
- Five (5) observations were identified. These relate to the content of the site induction, notification to the Department of Bitumen Products Facility (BPF) not being constructed, updating monitoring reports once the BPF is operational (2) and submission of updated OEMP to the Department.

Detailed findings are presented in Section 3 and Appendix A, along with the adequacy of management plans and the actions recommended by the auditor to address the audit findings.

The Auditor would like to thank the auditees from Downer for their high level of organisation, cooperation and assistance during the Independent Audit.

1. INTRODUCTION

1.1 Project overview

State significant development (SSD) 10459 provides for the development of a 35ha industrial subdivision over three stages (Stages 1, 2 and 3) known as the Central Sydney Industrial Estate (CSIE) on the site of the former Shell Clyde Refinery, and the construction and operation of a combined Downer Sustainable Road Resource Centre (DSRRC) in the Stage 1 area of the CSIE (the Development or the Project). The Development is located at 9 Devon Street, Rosehill (the site), in the Parramatta local government area (LGA) (refer to **Figure 1** for regional location and **Figure 2** for locality location of CSIE and DSRRC).

Figure 1: Regional Context (Source: DPIE, Nov 2021 SSD-10459-Mod-1 Assessment Report)

The consent for SSD-10459 was granted by the delegate of the Minister for Planning and Public Spaces on the 31 January 2021. SSD-10459 was modified on the 19 November 2021 by the Department of Planning and Environment (DPE or the Department) to amend the approved stormwater management system for Proposed Lots 51-55 (Mod-1). Mod-1 related only to the western CSIE portion of the development and not the DSRRC which has a stormwater drainage system that is independent of the remainder of the CSIE.

Figure 2: CSIE subdivision site and DSRRC in Lot 6 (Source: Element Environment, Nov 2020, Response to Submissions Report)

The DSRRC has been developed and is managed by Downer Group (Downer) under SSD-10459 and includes the construction and operation of an Asphalt Plant, a Reclaimed Asphalt Pavement (RAP) Facility, a Bitumen Products Facility and a Reconomy Facility (**Figure 3** shows the DSRRC site layout). These facilities are described below.

Asphalt Plant

The Asphalt Plant involves a fixed Ammann Universal HRT Stationary asphalt plant, which has approval to produce up to 550,000 tonnes per annum (tpa) of asphalt. The maximum height of fixed equipment is 41 m. The Asphalt Plant includes a range of infrastructure facilities such as bins to receive raw materials, conveyors, mixer, hoppers, storage silos and fan and stack for exhausting the gases from the baghouse. Incoming bitumen, lime and diesel are delivered by heavy-rigid and B-double tankers and aggregate is delivered by truck and dog and B-double. Asphalt product is transported to worksites by medium-rigid and semi-trailer. There is no mobile plant at the asphalt plant.

Reclaimed Asphalt Pavement (RAP) Facility

The consent provides for up to 250,000 tpa of RAP to be cold planed from pavements with specialist equipment and transported in tip trucks to the site. It is then stored in the dedicated RAP stockpile areas within the DSRRC site.

The RAP is granulated and screened on an as required basis for use in the production of asphalt (as a substitute for aggregates and bitumen) or for pavement materials. The RAP plant is inside an approximately 12m high shed that is enclosed on the north, west and south sides. The east side is open in parts so the front-end loader can feed the RAP plant and remove the finished products.

Up to 90,000 tpa of RAP will be stored on site at any one time. Stockpiles will be a maximum 10 m high.

Bitumen Products Facility

A next generation, co-located emulsion plant is proposed on Lot 6, which will manufacture approximately 15,000 tpa using a purpose-built plant and will involve careful formulation of the products to produce chemically stable and well performing materials. Construction of this facility has not commenced.

Reconomy Facility

Reconomy uses a customised material screening and processing plant and water treatment to recover materials, which are used in the manufacture of asphalt and other road products. The facility is approved to process up to 40,000 tpa of the following waste streams:

- Street sweeper/stormwater pit waste.
- Non-destructive digging mud.
- Material Recovery facility glass fines.

Material is separated during the recovery process and temporarily stockpiled adjacent to the recovery plant at the separation points and removed as required. Recovered aggregates and sand is beneficially reused in the adjacent asphalt plant and requires temporary storage bays as a collection point prior to transport to the asphalt plant.

The Reconomy Facility includes fixed plant (shed, conveyors, hoppers, etc) and mobile equipment including an excavator shared with the RAP facility and one front-end loader.

DSSRRC Operational Status

The DSRRC site has been in operation with the Asphalt Plant and the Reconomy Facility since 12 May 2022, noting that the EPA issued Downer with an Environment Protection Licence (EPL) (21611) for those facilities on the 11 May 2022. On the 30 June 2022 an EPL variation was issued by the EPA which allowed Downer to commence operations of the RAP facility on the 30 June 2022.

The Bitumen Products Facility approved under SSD-10459 has not been constructed and is not scheduled to be constructed at this point of time.

Figure 3: DSRRC Site Plan (Source: Element Environment, September 2020, EIS for SSD-10459)

1.2 Approval requirements

Conditions of Consent (CoC) C16 – C17 of Schedule 2 of SSD 10459 set out the requirements for undertaking Independent Audits. CoC C16(a) requires the audit to be prepared in accordance with the Department's document entitled *Independent Audit Post Approval Requirements* dated May 2020 (IAPAR).

1.3 The audit team

In accordance with CoC 16(b) and Section 3.1 of the IAPAR, Independent Auditors must be suitably qualified, experienced, and independent of the Project, and appointed by the Planning Secretary.

The Auditor who undertook this audit and was approved by the Department is:

- Ricardo Prieto-Curiel (Auditor Lead): Master of Environmental Toxicology, Registered Environmental Assessment Practitioner, Exemplar Global Certified Principal Environmental Auditor (Certificate No. 15160)

Approval of the Audit Team was provided by the Department on 25 June 2023. The letter is presented in Appendix C.

1.4 The audit objectives

The objective of this Independent Audit is to satisfy SSD-10459 Schedule 2, CoC C16, which states:

Within one year of the commencement of operations of the DSRRC, and every three years after, unless the Planning Secretary directs otherwise, the Applicant must commission and pay the full cost of an Independent Environmental Audit (Audit) of the development. Audits must:

(a) be prepared in accordance with the Independent Audit Post Approval Requirements (Department 2020)

(b) be led and conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Planning Secretary; and

(c) be submitted to the satisfaction of the Planning Secretary within three months of commissioning the Audit (or within another timeframe agreed by the Planning Secretary).

The Department's (2020) IAPAR sets out the scope, methodology and reporting requirements for Independent Audit.

This Independent Audit seeks to fulfill the requirements of CoC C16 and the IAPAR, verify compliance with the relevant CoCs and assess the effectiveness of environmental management on the DSRRC.

1.5 Audit scope

Subdivision works and activities under SSD-10459 comprising the staged industrial subdivision to create the CSIE are undertaken by VE Property Pty Ltd (the Applicant for SSD-10459) and are not

the subject of this audit. The DSRRC, constructed and operated by Downer in the newly created Lot 6 DP1271928 in the Stage 1 area of CSIE, is the subject of this audit. The DSRRC was operational at the time of the audit, therefore the audit covers the operational phase of the DSRRC (noting that CoC C16 requires the first audit within one year of the commencement of operations of the DSRRC) and those construction elements of the DSRRC that could be assessed by a desktop review.

This Independent Audit relates to the first 14 months of operations of the DSRRC from commencement of operations on the 12 May 2022 to the 20 July 2023 (the audit period).

The scope of the Independent Audit comprises:

- an assessment of compliance with:
 - all conditions of consent applicable to the phase of the development that is being audited
 - all post approval and compliance documents prepared to satisfy the conditions of consent, including an assessment of the implementation of Environmental Management Plans and Sub-plans; and
 - all environmental licences and approvals applicable to the development excluding environment protection licences issued under the *Protection of the Environment Operations Act 1997*.
- a review of the environmental performance of the development, including but not necessarily limited to, an assessment of:
 - actual impacts compared to predicted impacts documented in the environmental impact assessment
 - the physical extent of the development in comparison with the approved boundary
 - incidents, non-compliances and complaints that occurred or were made during the audit period
 - the performance of the development having regard to agency policy and any particular environmental issues identified through consultation carried out when developing the scope of the audit; and
 - feedback received from the Department, and other agencies and stakeholders, including the community or Community Consultative Committee, on the environmental performance of the project during the audit period
- a review of the status of implementation of previous Independent Audit findings, recommendations and actions (if any)
- a high-level review of the project's environmental management systems
- a high-level assessment of whether Environmental Management Plans and Sub-plans are adequate; and

- any other matters considered relevant by the auditor or the Department, taking into account relevant regulatory requirements and legislation, knowledge of the development's past performance and comparison to industry best practices.

2. AUDIT METHODOLOGY

2.1 Audit process

The Independent Audit was conducted in a manner consistent with AS/NZS ISO 19011.2019 – Guidelines for Auditing Management Systems and the methodology set out in the Department’s IAPAR.

2.2 Audit process detail

2.2.1 Audit initiation, Scope Development and Consultation

Prior to the commencement of the audit the following tasks were completed:

- Establish initial contact with the Auditee.
- Confirm the audit team.
- Confirm the audit purpose, scope and criteria.

On 7 July 2023 WolfPeak consulted with the Department to obtain their input into the scope of the Independent Audit and any additional consultation that may be required in accordance with Section 3.2 of the IAPAR. The Department had no comment on the proposed scope that is not captured by the Consent, including Schedule 2 Condition C16 and the Department’s Independent Audit Post Approval Requirements (May 2020). The Department requested consultation with the City of Parramatta Council. On the 7 and 13 July 2023 WolfPeak consulted with the City of Parramatta Council. The City of Parramatta Council responded that it has no further comment beyond that raised by the Department. The consultation records are presented in Appendix D.

A summary of the consultation responses and areas of focus raised by the stakeholders is presented in Table 1.

Table 1: Key issues and areas of focus raised during consultation

Stakeholder	Issues and Focus	How Addressed
Department of Planning, Industry and Environment	No comment on the proposed scope that is not captured by the Consent, including Schedule 2 Condition C16 and the Department’s Independent Audit Post Approval Requirements (May 2020). Requested to consult with the City of Parramatta Council.	These matters have been included in the Independent Audit. Refer Section 3.6 and Appendix A.
City of Parramatta Council	Council has no further comment for this matter beyond that raised by Department of Planning and Environment	-

2.2.2 Preparing audit activities

The Auditor performed a document review, prepared an audit plan, and prepared work documents (audit checklists) and distributed to the Project team in preparation for the Independent Audit.

2.2.3 Site personnel involvement

The on-site audit activities took place on 20 July 2023. The following personnel took part in the audit:

- Colin Biggs, Environmental and Sustainability Advisor, Downer Group
- Paul Sherry, Production Manager, Downer Group
- Matthew Wade, Reconomy Operations Manager, Downer Group
- Gordon Mclisky, Assistant Production Manager, Downer Group
- Bulen Cesurcan, Technical / Lab Manager, Downer Group
- Dale Thomas, Environment and Sustainability Manager, Downer Group

2.2.4 Meetings

Opening and closing meetings were held with the Auditor and Project personnel on the 20 July 2023. The attendance sheet can be found in Appendix D.

During the opening meeting the following key items were discussed:

- the objectives and scope of the Independent Audit,
- the resources required and methodology to be applied,
- overview of the project and status of site activities, and
- audit timeframes and expectations.

At the closing meeting, preliminary audit findings were presented, preliminary recommendations (as appropriate) were made, and any post-audit actions were confirmed.

2.2.5 Interviews

The Auditor conducted face to face interviews during the site inspection on the 20 July 2023 with key personnel involved in Project delivery, including those with responsibility for environmental management, to assist with verifying the compliance status of the development. All other communication was conducted remotely, which included detailed request for information and auditee responses to the request. The names of personnel interviewed during the audit are provided in Section 2.2.3.

2.2.6 Site inspection

The on-site audit activities took place on 20 July 2023. The on-site audit activities included an inspection of the site and work activities to verify implementation of mitigation measures from the Operational Environmental Management Plan and sub-plans relevant to the operational activities taking place at the time of the inspection. Photos are presented in Appendix E.

2.2.7 Document review

The Independent Audit included investigation and review of Project files, records and documentation that acts as evidence of compliance (or otherwise) with a compliance requirement. The primary documents reviewed are listed in Section 3.1. All documents reviewed and sighted during the audit are included within Appendix A.

2.2.8 Generating audit findings

Independent Audit findings were based on verifiable evidence. The evidence included:

- relevant records, documents and reports
- interviews of relevant site personnel
- photographs
- figures and plans; and
- site inspections of relevant locations, activities and processes.

Section 3 and Appendix A present the general audit findings and Section 4 presents the summary of findings and audit conclusions.

2.2.9 Compliance evaluation

The Auditor determined the compliance status of each compliance requirement using the descriptors from Table 2 of the IAPAR. These are replicated in Table 2 below.

Table 2: Compliance status descriptors from Table 2 of the IAPAR

Status	Description
Compliant	The Auditor has collected sufficient verifiable evidence to demonstrate that all elements of the requirement have been complied with within the scope of the audit.
Compliant	WolfPeak considers that it is the role of the Certifier or other authority / expert to verify compliance with this condition and has marked this requirement as compliant on the basis of their assessment or advice.
Non-compliant	The Auditor has determined that one or more specific elements of the conditions or requirements have not been complied with within the scope of the audit.
Not Triggered	A requirement has an activation or timing trigger that has not been met at the time when the audit is undertaken, therefore an assessment of compliance is not relevant.

Observations and notes may also be made to provide context, identify opportunities for improvement or highlight positive initiatives.

2.2.10 Evaluation of post approval documentation

The Auditor assessed whether post approval documents:

- have been developed in accordance with the CoCs and all other environmental licences and approvals applicable to the Project (if any) and their content is adequate.
- have been implemented in accordance with the CoCs and all other environmental licences and approvals applicable to the Project (if any).

The adequacy of post approval documents was determined on the basis of whether:

- there are any non-compliances resulting from the implementation of the document.
- whether there are any opportunities for improvement.

2.2.11 Completing the audit

The Independent Audit Report was distributed to Downer to check factual matters and for input into actions in response to findings (where relevant). The Auditor retained the right to make findings or recommendations based on the facts presented. The Auditor's findings have been determined independent of the auditees, the Department and any other parties, based on the evidence assessed during the audit.

3. AUDIT FINDINGS

3.1 Approvals and documents audited and evidence sighted

The documents audited comprised all the conditions from Schedule 2 of SSD 10459 applicable to the works being undertaken.

The primary documents reviewed prior to and after the site visit are as follows:

- Development Consent (SSD-10459) dated 31/04/2021 signed by Mike Young, Exec. Director, Energy, Industry and Compliance as delegate for the Minister for Planning and Public Spaces, as modified on 19 November 2021 (Mod-1)
- Central Sydney Industrial Estate incorporating the Sustainable Road Resource Centre State Significant Development Application Environmental Impact Statement Prepared for VE Property Pty Ltd and Downer EDI Works Pty Ltd | September 2020
- Central Sydney Industrial Estate incorporating the Sustainable Road Resource Centre State Significant Development Application Response to Submissions Prepared for VE Property Pty Ltd and Downer EDI Works Pty Ltd | November 2020
- Central Sydney Industrial Estate incorporating the Sustainable Road Resource Centre State Significant Development Assessment SSD-10459, Department of Planning, Industry and Environment (DPIE), January 2021
- Central Sydney Industrial Estate and Downer Sustainable Road Resource Centre Modification 1, SSD Modification Assessment (SSD-10459 Mod-1), DPIE November 2021
- Operational Environmental Management Plan Rosehill Sustainable Road Resource Centre, Downer, Rev 4, 25 January 2022
- Construction Environmental Management Plan Rosehill Sustainable Road Resource Centre, Downer 1 February 2021
- Landscape Management Plan Lot 6 – Downer Sustainable Road Resource Centre, Geoscapes, 2 February 2021
- Site Audit Statement 055-2127799 by Site Auditor Andrew Kohlrusch for Stage 1 Area dated 23 December 2020
- Clyde Western Area Remediation Project Stage 1 – Long Term Environmental Management Plan, ERM 29 January 2021
- Air Quality Verification Report Downer Sustainable Road Resource Centre, Todoroski Air Sciences, 21 November 2022

- Noise Verification Report Downer Sustainable Road Resource Centre, Muller Acoustic Consulting (MAC), October 2022

All records and evidence sighted against each requirement are detailed within Appendix A.

3.2 Summary of Compliance

This Section, including Table 3, presents the status of the findings from the first Independent Audit. Actions in response to each of the findings are also presented. Detailed findings against each requirement are presented in Appendix A. In summary:

- There were 111 CoCs assessed.
- Three (3) non-compliances were identified. These relate to notification of non-compliances to the Department, timing of first independent audit and project website content.
- 76 CoCs were considered by the Auditor to be compliant.
- 32 CoCs were considered by the Auditor to be not triggered.
- Five (5) observations were identified. These relate to the content of the site induction, notification to the Department of Bitumen Products Facility (BPF) not being constructed, updating monitoring reports once the BPF is operational (2) and submission of updated OEMP to the Department.

The overall outcome of the Independent Audit was positive. The findings identified in the audit were of an administrative nature.

Table 3: Findings and recommended actions from the First Independent Audit.

Item	Ref.	Type	Details of item	Recommended action	By whom and by when	Status
IA1-1	CoC A9	Observation	The site induction to staff and contractors does not specifically mention residual contamination capped on site and controls under the Long Term Environmental Management Plan (LTEMP) (ERM, 17/12/2020) for intrusive works	Update the site induction to inform of presence of residual contamination capped on site and controls for intrusive works or prepare a specific intrusive works induction for personnel doing intrusive works	Downer Prior to any ground disturbance works (e.g. maintenance) and induction of personnel associated with ground disturbance	OPEN
IA1-2	CoC A12	Observation	The Bitumen Products Facility (BPF) had not been constructed at the time of the audit and Downer advised the auditor that it has no plans to construct it in the near future. The notifications submitted to the Department in relation to commencement of construction and operations of the DSRRC under Condition A11 do not advise of the exclusion from construction and operation of the BPF or any consideration about staging the BPF.	Notify the Department that the DSRRC's Bitumen Products Facility (BPF) has not been constructed and that Downer has no plans to construct it in the near future. If Downer decides to construct the BPF, assess and identify the consent implications of developing the BPF in consultation and agreement with DPE (eg. validity of consent after 5 years, simultaneous construction and operational activities, etc).	Downer Within 3 months of the First Independent Audit	OPEN
IA1-3	CoC B10	Observation	The AQVR (Todoroski Air Sciences, 21/11/2022) does not cover all plant operations as the BPF is yet to be constructed and operated	Update and submit to the EPA and DPE the AQVR within 3 months of commencement of operation of the DSRRC's BPF (subject to the outcome of Finding IA1-2)	Downer Within 3 months of commencement of operation of the DSRRC's BPF	OPEN
IA1-4	CoC B17	Observation	The NVR (MAC, 24/10/2022) does not cover all plant operations as the BPF is yet to be constructed and operated	Update and submit to the EPA and DPE the NVR within 3 months of commencement of operation of the DSRRC's BPF (subject to the outcome of Finding IA1-2)	Downer Within 3 months of commencement of operation of the DSRRC's BPF	OPEN
IA1-5	CoC C5	Observation	A new version of the OEMP (Rev 5, dated 14/02/2023, available in the project website) has not been submitted to DPE for approval.	Submit updated versions of the OEMP to DPE in accordance with Conditions C5 and C8.	Downer As soon as the OEMP is updated and approved internally, but no later than 3 months from this audit	OPEN
IA1-6	CoC C11	Non-compliance	The non-compliance with Condition C16 regarding the timing of the first independent audit was not reported to the Planning Secretary within 7 days of becoming aware of the non-compliance	Retrospectively notify the Department of the non-compliance with Condition C16	Downer Immediately	OPEN
IA1-7	CoC C16	Non-compliance	The First Independent Audit was commissioned more than a year after commencement of operations on the 12/5/23	In future audits, ensure that the Independent Environmental Audit is undertaken within the timeframes of C16	Downer Within the timeframes of C16	CLOSED
IA1-8	CoC C19	Non-Compliance	Some of the DSRRC's current statutory approvals are not uploaded in the project website (e.g. EPL, TWA)	Upload in the project website all current statutory approvals of the DSRRC	Downer As soon as the statutory approval is obtained	OPEN

3.3 Adequacy of Environmental Management Plans, sub-plans and post approval documents

The adequacy of post approval documents must be determined on the basis of whether:

- there are any non-compliances resulting from the implementation of the document.
- whether there are any opportunities for improvement.

The OEMP and associated sub-plans listed in Section 3.1 and approved by the Department were considered compliant with the requirements of the CoCs and the mitigation measures in the consent and environmental assessment documents have generally been included in the OEMP documents.

The OEMP and associated sub-plans were observed to be implemented for the activities being undertaken at the time of the audit as further discussed in Appendix A. The auditor however noted that the site induction does not specifically mention residual contamination capped on site and controls under the *Clyde Western Area Remediation Project, Stage 1 Long Term Environmental Management Plan* (LTEMP) (ERM, Dec 2020) for ground intrusive works. This observation was made within the context of the Site Audit Statement (SAS) issued for the DSRRRC site by the accredited site auditor under the *Contaminated Land Management Act 1997* which requires the implementation of the LTEMP prepared following remediation to manage capped contamination. The LTEMP only requires active controls in the event of ground disturbance. The auditor considered that the LTEMP is implemented in accordance with the SAS and condition A9, but recommended that the site induction be updated to inform of presence of residual contamination capped on site and the specific controls for intrusive works or that a specific induction for intrusive works be prepared and provided to workers required to do intrusive works.

3.4 Summary of notices from agencies

The Auditor is not aware of any formal notices from agencies during the audit period, other than the letters of approval for the management plans, strategies, programs and reports, and the issuing of the EPL and EPL variation notices by the EPA.

3.5 Other matters considered relevant by the Auditor or DPE

3.5.1 Matters considered relevant by the Auditor

As indicated in Section 1.5, subdivision works and activities under SSD-10459 comprising the staged industrial subdivision to create the CSIE are undertaken by VE Property Pty Ltd (the Applicant for SSD-10459) are not the subject of this audit. The DSRRRC, constructed and operated by Downer in the newly created Lot 6 DP1271928 in the Stage 1 area of CSIE, is the subject of this audit.

Also, and as noted previously, the DSRRRC was approved for four main operational facilities including an Asphalt Plant, a Reclaimed Asphalt Pavement (RAP) Facility, a Bitumen Products Facility (BPF) and a Reconomy Facility. However, the BPF had not been constructed (at the time

of the audit) and Downer advised that it has no plans to construct it in the near future. In that regard, the notifications submitted by Downer to the Department in relation to commencement of construction and operations of the DSRRC under Condition A11 do not advise of the exclusion from construction and operation of the DSRRC's BPF or consideration about staging the BPF. The auditor has made a recommendation for Downer to notify the Department that the DSRRC's BPF has not been constructed and had no intention to construct it in the near future, and that if Downer decides to construct the BPF in the future, it will need to assess and identify the consent implications of developing the BPF in consultation and agreement with the Department (eg. validity of consent to BPF after 5 years, simultaneous construction and operational activities, etc).

The auditor has also noted that some of the operational monitoring reporting prepared under the consent (i.e. Noise Verification Report, Air Quality Verification Report), will need to be updated if the BPF becomes operational. Other than that, the auditor did not find any negative environmental implications or compliance issues associated with the absence of the BPF in the site operations. On the other hand, not having the BPF operational results in less production and a reduction in potential environmental impacts (e.g. traffic, etc).

The Auditor has no other matters beyond those discussed above and the findings presented elsewhere in Section 3.2 of this Report.

3.6 Complaints

According to the Complaints register and interviews with Downer, there have been no complaints since commencement of operations.

3.7 Incidents

There were no notifiable incidents as defined in SSD-10459 during the Audit period.

3.8 Actual versus predicted impacts

The audit considered the actual impacts arising from the carrying out of the Project (and whether they are consistent with the relevant impacts predicted in the EIS and RtS Report. A summary of the assessment is presented in Table 5. The Department's SSD-10459 (Jan 2021) considered the key assessment issues are operational noise, air quality and odour, water quality and riparian zone management.

Table 5: Summary of predicted versus actual impacts for key operational assessment issues

Aspect	Summary of predicted impacts	Summary of actual impacts observed during audit period	Consistent (Y/N)
Contamination	The Stage 1 area can be made suitable for commercial/industrial land upon successful completion of the remediation action strategy. Remediation works in accordance with the Stage 1 remediation action plan (RAP) commenced in 2020 and the relevant Section A site audit statement, confirming the suitability of the site for ongoing commercial/industrial use, will be issued prior to the end of 2020.	<p>Section A2 site audit statement no. 055-2127799 issued by EPA accredited site auditor Andrew Kohlrusch and dated 23 December 2020 certifies that the Stage 1 area is suitable for commercial/industrial uses subject to the implementation of the <i>Clyde Western Area Remediation Project, Stage 1 Long Term Environmental Management Plan (LTEMP)</i> prepared by ERM and dated 17 December 2020.</p> <p>Downer implements the LTEMP which only requires active controls in the event of ground disturbance. Downer procedures and training to staff require that any excavation works require Downer's approval of excavation permits and SWMS. Excavation permits include a Risk Assessment and formal approval by Downer. Some recommendations have been made by the auditor regarding LTEMP training.</p>	Y
Noise	Noise generated during operation of Stage 1 will not exceed project noise trigger levels at nearby receivers, with the proprietary noise reduction measures incorporated into the asphalt plant design.	<p>Noise Verification Report (NVR) 24/10/2022, Muller Acoustic Consulting (MAC) (CoC B17) provided directed attended noise measurements at seven representative monitoring locations during operations and predictive modelling. MAC (24/10/2022) concluded that noise emissions generated by the site comply with the relevant criteria at all assessed residential and industrial receivers.</p> <p>No operational complaints received to date and no noise issues were observed during the auditor's site inspection on 20/07/2023.</p>	Y

Aspect	Summary of predicted impacts	Summary of actual impacts observed during audit period	Consistent (Y/N)
Air quality and odour	<p>Dust, other pollutants and odour generated during the project will not exceed criteria at residential receivers. However, cumulative criteria will be exceeded for nearby industrial and commercial receivers. Industrial receivers are subject to workplace air quality standards and the approved methods criteria are not applicable. The exceedance at the commercial receiver is minor and people would not be in this commercial premises for long term periods (ie an annual period). The 24-hour average concentrations at the commercial premises will be below the short-term criteria. Management measures will be implemented to further reduce the potential for dust impacts during construction and operation of the project.</p>	<p>Todoroski Air Sciences (TAS) (21/11/2022) report titled Air Quality Verification Report Downer Sustainable Road Resource Centre TAS (21/11/2022) indicates that the post-commission sampling (on 2/08/22 and 19/10/22) of the asphalt plant exhaust stack and a site inspection (on 7/9/22) undertaken to verify the air quality controls for the DSRRC shows that, while some pollutants measured during the post-commission sampling of the asphalt plant exhaust stack were higher than those estimated in the AQIA, all impacts from the Project were well below the relevant impact assessment criteria. TAS (21/11/22) indicates that no excessive visible dust was observed during the site inspection of 7/9/22. Further, no excessive visible dust was observed or odour noted during the auditor inspection on 20/7/23</p> <p>No air quality complaints received since commencement of operations.</p>	Y
Water quality	<p>Separate water management systems will be constructed and maintained for construction and operations in Lot 6 (the DSRRC) and construction on the remainder of the subdivision.</p> <p>Water which falls on hard surfaces will drain into pits and flow through the pipes to a gross pollutant trap (GPT), and then to a bioretention basin then to a new outlet to Duck River.</p> <p>During the operational phase of the development, the proposed stormwater quality treatment system incorporating the use of a treatment train of gross pollutant traps and bio-retention filtration is proposed to mitigate any increase in stormwater pollutant load generated by the development.</p>	<p>The DSRRC operates its own stormwater management system as shown in the approved OEMP and observed during the auditor's site inspection on 20/7/24.</p> <p>A bioretention basin has been constructed at the southern part of the site, including a GPT, in accordance with the approved OEMP and LMP. Grasses and sedges have been planted in the bioretention basin which provides for water filtration and nutrient uptake by the plants.</p> <p>Downer undertakes water quality monitoring at the bioretention basin during discharges in accordance with the OEMP. A surface water verification report is required under CoC B29 within 18 months of commencement of operations.</p>	Y
Riparian zone management	<p>A 40m riparian corridor to be maintained along the Duck River</p>	<p>A 40m riparian area is established and has been landscaped in accordance with the approved OEMP and LMP.</p> <p>The riparian area is fenced off from the remainder of the site.</p>	Y

Aspect	Summary of predicted impacts	Summary of actual impacts observed during audit period	Consistent (Y/N)
Waste	Stage 1 (the DSRRC) will accept wastes from offsite, which will be processed, with some material re-used in onsite processes and the remainder reused, recycled or disposed offsite. Some waste materials processed offsite, will be used onsite in the production of asphalt. Material will be reused onsite to produce asphalt in accordance with the resource exemptions and orders.	Some waste is received on site in accordance with the DSRRC's EPL (21611) and the consent. The waste is reused on onsite for the production of asphalt in accordance with approved resource recovery exemptions and orders. Some general solid waste is generated during production activities which is removed off site to waste management facilities licensed to accept such waste. Downer incorporates strict waste tracking and waste management measures in its processes and OEMP as discussed in Appendix A.	Y

The physical extent of the DSRRC appeared to be consistent with the approved boundary shown in the consent's layout plans.

4. CONCLUSIONS

This Audit Report presents the findings from the first Independent Audit of the DSRRC operations, covering the first 14 months of operations, from commencement of operations on the period from 12 May 2022 to 20 July 2023 (the audit period). As the DSRRC was operational at the time of the audit, the audit also addressed those construction elements of the DSRRC that could be assessed on a desktop review.

The overall outcome of the Independent Audit was positive. Compliance records were organised and available at the time of the site inspection and interviews with Downer project personnel. Relevant environmental and compliance monitoring records were being collected and reported as required to provide verification of compliance to statutory requirements and the DSRRC environmental requirements. The audit findings were of an administrative nature. In summary:

- There were 111 CoCs assessed.
- Three (3) non-compliances were identified. These relate to notification of non-compliances to the Department, timing of first independent audit and project website content.
- 76 CoCs were considered by the Auditor to be compliant.
- 32 CoCs were considered by the Auditor to be not triggered.
- Five (5) observations were identified. These relate to the content of the site induction, notification to the Department of Bitumen Products Facility (BPF) not being constructed, updating monitoring reports once the BPF is operational (2) and submission of updated OEMP to the Department.

The Auditor would like to thank the auditees from Downer for their high level of organisation, cooperation and assistance during the Independent Audit.

5. LIMITATIONS

This Document has been provided by WolfPeak Pty Ltd (WolfPeak) to the Client and is subject to the following limitations:

This Document has been prepared for the particular purpose/s outlined in the WolfPeak proposal/contract/relevant terms of engagement, or as otherwise agreed, between WolfPeak and the Client.

In preparing this Document, WolfPeak has relied upon data, surveys, analyses, designs, plans and other information provided by the Client and other individuals and organisations (the information). Except as otherwise stated in the Document, WolfPeak has not verified the accuracy or completeness of the information. To the extent that the statements, opinions, facts, findings, conclusions and/or recommendations in this Document (conclusions) are based in whole or part on the information, those conclusions are contingent upon the accuracy and completeness of the information. WolfPeak will not be liable in relation to incorrect conclusions should any information be incomplete, incorrect or have been concealed, withheld, misrepresented or otherwise not fully disclosed to WolfPeak.

With respect to conditions relating to compliance with the design, Building Codes of Australia (BCA) or satisfaction of the Independent Verifier / Certifier / Certifying Authority, the Independent Audits relied on confirmation from the Independent Verifier / Certifier / Certifying Authority that this is the case. The Independent Audits do not extend to an assessment of the works against the design or BCA requirements themselves, nor did they examine the steps the Independent Verifier / Certifier / Certifying Authority has taken to verify that the design is compliant.

This Document has been prepared for the exclusive benefit of the Client and no other party. WolfPeak bears no responsibility for the use of this Document, in whole or in part, in other contexts or for any other purpose. WolfPeak bears no responsibility and will not be liable to any other person or organisation for or in relation to any matter dealt with in this Document, or for any loss or damage suffered by any other person or organisation arising from matters dealt with or conclusions expressed in this Document (including without limitation matters arising from any negligent act or omission of WolfPeak or for any loss or damage suffered by any other party relying upon the matters dealt with or conclusions expressed in this Document). Other parties should not rely upon this Document or the accuracy or completeness of any conclusions and should make their own inquiries and obtain independent advice in relation to such matters.

To the best of WolfPeak's knowledge, the facts and matters described in this Document reasonably represent the Client's intentions at the time of which WolfPeak issued the Document to the Client. However, the passage of time, the manifestation of latent conditions or the impact of future events (including a change in applicable law) may have resulted in a variation of the Document and its possible impact. WolfPeak will not be liable to update or revise the Document to take into account any events or emergent circumstances or facts occurring or becoming apparent after the date of issue of the Document.

APPENDIX A – SSD 10459 CONDITIONS OF CONSENT

Unique ID	Compliance requirement	Evidence collected	Independent Audit findings and recommendations	Compliance Status
SCHEDULE 2				
PART A - ADMINISTRATIVE CONDITIONS				
OBLIGATION TO MINIMISE HARM TO THE ENVIRONMENT				
A1	In addition to meeting the specific performance measures and criteria in this consent, all reasonable and feasible measures must be implemented to prevent, and if prevention is not reasonable and feasible, minimise, any material harm to the environment that may result from the construction and operation of the development, and any rehabilitation required under this consent.	<p>Site inspection 20/07/2023</p> <p>Interviews with auditees 20/07/2023</p> <p>Operation Environmental Management Plan (OEMP) Rosehill Sustainable Resource Centre, rev 4 dated 25 January 2022</p> <p>Implementation of approved OEMP rev 4 dated 25 January 2022</p> <p>Evidence referred to elsewhere in this table</p>	<p>Downer has shown that practical and reasonable precautions are being taken to avoid or lessen environmental damage.</p> <p>During the site inspection no harm to the environment was noted.</p> <p>Additionally, since commencement of operations and during the audit period there were no reportable incidents or complaints.</p>	Compliant
TERMS OF CONSENT				
A2	<p>The development may only be carried out:</p> <p>(a) in compliance with the conditions of this consent;</p> <p>(b) in accordance with all written directions of the Planning Secretary;</p> <p>(c) in accordance with the EIS and Response to Submissions;</p> <p>(d) in accordance with the Modification Assessments;</p> <p>(e) in accordance with the Development Layout in Appendix 1; and</p> <p>(f) in accordance with the management and mitigation measures in Appendix 2.</p>	<p>Development Consent SSD 10459, 31/01/2021, DPE</p> <p>EIS for Central Sydney Industrial Estate (CSIE) incorporating the Sustainable Road Resource Centre (SRRC) Rev 1, 18/09/2023, Element Environment</p> <p>Response to Submission (RtS) for CSIE incorporating the SRRC Rev 1, 30/11/2020, Element Environment</p> <p>Central Sydney Industrial Estate Development plans stamped, 8/07/2020 by Costin Roe Consulting (DPE approved stamped 31/01/2021)</p> <p>Operational Environmental Management Plan (OEMP) Rev 4 dated 25/01/2022</p> <p>Construction Certificate No. 201700/01, McKenzie Group, for DSRRRC SSD-10459, dated 1/03/2021</p> <p>Occupation Certificate No. 201700/03, McKenzie Group, for DSRRRC SSD-10459, dated 17/05/2022</p> <p>Evidence referred to elsewhere in this table.</p>	<p>The review of project information and records, interviews with Downer personnel and the site inspection on 20/07/2023 indicates that the development is compliance with the terms of A2.</p> <p>Construction and occupation certificates for the DSRRRC were provided by Downer during the audit .</p> <p>The OEMP rev 4 dated 25 January 2022 and associated subplans approved by DPE in correspondence dated 4/2/22 generally included the mitigation measures in the consent. The OEMP is implemented.</p> <p>The auditee advised that it has not received any written directions from the Planning Secretary</p>	Compliant
A3	<p>Consistent with the requirements in this consent, the Planning Secretary may make written directions to the Applicant in relation to:</p> <p>(a) the content of any strategy, study, system, plan, program, review, audit, notification, report or correspondence submitted under or otherwise made in relation to this consent, including those that are required to be, and have been, approved by the Planning Secretary; and</p> <p>(b) the implementation of any actions or measures contained in any such document referred to in condition A3(a).</p>	<p>Interviews with auditees on 20/7/22 and review of project records</p>	<p>The auditee advised that no written directions have been received from the Planning Secretary</p>	Not triggered

Unique ID	Compliance requirement	Evidence collected	Independent Audit findings and recommendations	Compliance Status
A4	The conditions of this consent and directions of the Planning Secretary prevail to the extent of any inconsistency, ambiguity or conflict between them and a document listed in condition A2(c) or A2(d) and A2(f). In the event of an inconsistency, ambiguity or conflict between any of the documents listed in condition A2(c) or A2(d) and A2(f), the most recent document prevails to the extent of the inconsistency, ambiguity or conflict.		No inconsistencies identified during the audit in documents listed in condition A2(c) or A2(d) and A2(f)	Not triggered
LIMITS OF CONSENT				
Lapsing				
A5	This consent lapses five years after the date from which it operates, unless the development has physically commenced on the land to which the consent applies before that date.	Development Consent SSD 10459, 31/01/2021, DPE Letter dated 12/02/2021 EE to DPE re: Notification of Commencement of Construction DSRRC Stage 1 commencing on 25/02/2021 Letter 2/05/2022 EE-DPE re: Commencement of Operation Stage – 12/05/2022	The physical construction and commencement of operation did occur within the five-year period from the approval of the development consent. Note: the Bitumen Products plant has not been constructed yet and Downer has no plans to construct in in the near future. Refer to Observation under Condition A12	Compliant
A6	The draft section 88B instrument (Conveyancing Act 1919) submitted by the Applicant as part of the Response to Submissions does not form part of this consent.			Not triggered
Development Limits - DSRRC				
A7	The DSRRC is not to exceed the following production or processing limits: (a) 550,000 tonnes per year of Asphalt production; (b) 250,000 tonnes per year of Reclaimed Asphalt Pavement processing; (c) 15,000 tonnes per year of Bitumen Products production; and (d) 40,000 tonnes per year of Reconomy processing.	All material coming in and out the SDRRC site goes through weighbridges. Weighbridge records are kept in Downer's SharePoint in a dedicated folder named "SRRC Waste Register". The SRRC Waste Register contains all weighbridge records including production. The SRRC Waste Register was viewed during the audit. The register includes truck registration number, tonnage, date/time, customer, product, gross/tare/net weight. In addition, Stocktake Reports are prepared monthly by Downer's accountant reporting asphalt production. Asphalt volume report dated 1/6/23 to 30/6/23 (50,935 tonnes in that period) viewed during the audit. Other production volumes were provided based on Downer database register.	Asphalt production from 1 May 22 to 30 April 2023: 315,883 tonnes RAP production from 1 June 22 to 30 May 2023: 177,330 tones Reconomy production: 1 June 2022 to 1 June 2023 7,983 tonnes	Compliant
Works under SSD 9302 – Western Area Remediation Project				
A8	Prior to the issue of a Subdivision Certificate for each of Stages 1B, 2 and 3, the Applicant must submit to the Planning Secretary and Certifier the following which are to demonstrate the relevant stage has been remediated in accordance with the approval of SSD 9302 and is suitable for an industrial land use:	Site Audit Statement (SAS) 055-2127799 by Andrew Kohlrusch dated 23/12/2020 issued for Stage 1 area Plan of Subdivision of Lot 1 DP1271927 into lots 5 and 6 of DP1271928 registered on	Site Audit Statement (SAS) 055-2127799 by Andrew Kohlrusch dated 23/12/2020 commissioned by Viva Energy Australia Pty Ltd issued for Stage 1 area (Part Lot 100 in DP1168951) certified that the Stage 1 area is suitable for commercial/industrial use subject to	Compliant

Unique ID	Compliance requirement	Evidence collected	Independent Audit findings and recommendations	Compliance Status
	<p>(ii) a Site Audit Statement (accompanied by an Environmental Management Plan, if required by an EPA accredited Site Auditor); and</p> <p>(iii) an accompanying Site Audit Report prepared by an EPA accredited Site Auditor in accordance with the NSW Contaminated Land Management – Guidelines</p>	<p>09/01/2023 (DSRRC is new created Lot 6 DP1271928) and executed by VE Property Pty Ltd</p>	<p>compliance with "Clyde Western Area Remediation Project, Stage 1 Long Term Environmental Management Plan" by ERM (17/12/2020) (SAS attached in OEMP version 4 dated 25/01/2022). SSD 9302 referenced in SAS 055-2127799</p> <p>Note: Subdivision activities undertaken by the Applicant VE Property including the submission of documentation in accordance with A8 not covered by this audit (Note: the SAS was submitted to the Planning Secretary with the submission of the DSRRC's OEMP (refer to C5)).</p> <p>Downer responsible for construction and operation of the DSRRC in the Stage 1B subdivision site. Plan of Subdivision of Lot 1 DP1271927 into lots 5 and 6 of DP1271928 registered on 09/01/2023 (DSRRC is new created Lot 6 DP1271928) and executed by VE Property Pty Ltd</p>	
A9	<p>The Applicant must implement the Long Term Environmental Management Plan (LTEMP) approved under condition B8 of SSD 9302 and provide evidence to the Planning Secretary that the LTEMP is listed on the relevant planning certificate(s) issued under section 10.7 of the EP&A Act for each lot created by Stages 1A and B, 2 and 3 as shown in the 'Subdivision Drawings prepared by Land Partners' in Appendix 1.</p>	<p>LTEMP (ERM, 17/12/2020)</p> <p>Site inspection on 20/7/23</p> <p>Planning Certificate under Section 10.7 of the EP&A Act</p> <p>Interviews and review of records</p> <p>Downer's Excavation Permit form</p> <p>Induction and training records (refer to CoC A20)</p> <p>Post Approval notification to the Department - planning portal - (from Mark Roberts, Downer) with "Description of the document and reason for submission / Overview of changes made to existing documents: SSD 10459 – Central Sydney Industrial Estate, Devon Street, Cond 9A - Evidence to the Planning Secretary that the LTEMP is listed on the relevant planning certificate"</p>	<p>Downer responsible for implementing the LTEMP (ERM, 17/12/2020) on the DSRRC site.</p> <p>The LTEMP requires maintenance of passive control systems only. Under the LTEMP, non-intrusive works do not require active management controls.</p> <p>Downer implements the LTEMP which only requires active controls in the event of ground disturbance. Downer procedures and training to staff require that any excavation works require Downer's approval of excavation permits and SWMS. Excavation permits include a Risk Assessment and formal approval by Downer.</p> <p>Planning Certificate for Lot 6 DP1271928 lists the EMP and also indicates that the land is the subject of a Site Audit Statement</p> <p>Note: Subdivision activities undertaken by the Applicant VE Property including the submission of documentation in accordance with A9</p> <p>Observation: the site induction to staff and contractors does not specifically mention residual contamination capped on site and controls under the LTEMP for intrusive works</p> <p>Recommendation: update the site induction to inform of presence of residual contamination capped on site and controls for intrusive works or prepare a specific intrusive works induction for personnel doing intrusive works</p>	Compliant

Unique ID	Compliance requirement	Evidence collected	Independent Audit findings and recommendations	Compliance Status
A10	Nothing in this consent limits, restricts or removes the conditions of consent for SSD 9302.			Not triggered
NOTIFICATION OF COMMENCEMENT				
A11	The date of commencement of each of the following phases of the development must be notified to the Planning Secretary in writing, at least one week before that date, or as otherwise agreed with the Planning Secretary: <ul style="list-style-type: none"> (a) construction; (b) operation; and (c) cessation of operations. 	Letter dated 12/02/2021 EE to DPE re: Notification of Commencement of Construction of DSRRC on 25/02/2021 Letter dated 2/05/2022 EE to DPE re: Commencement of Operations of DSRRC on 12/05/2022	The notification of commencement of construction was submitted to the Department in correspondence dated 12/02/2021 for commencement on 25/02/2021 which is within the required timeframe set forth in this condition. The notification of the commencement of operation was submitted to the Department in correspondence dated 2/05/2022 for commencement on 12/05/2022 which is within the required timeframe set forth in this condition.	Compliant
A12	If the construction or operation of the development is to be staged, the Planning Secretary must be notified in writing, at least one week before the commencement of each stage (or other timeframe agreed with the Planning Secretary), of the date of commencement and the development to be carried out in that stage.	Letter dated 12/02/2021 EE to DPE re: Notification of Commencement of Construction of DSRRC on 25/02/2021 Letter dated 2/05/2022 EE to DPE re: Commencement of Operations of DSRRC on 12/05/2022 Construction of the Bitumen Products Plan has not been undertaken or commenced. Downer advised the auditor that it has no short term plans to constructed the BPP.	Commencement of construction and operation of the DSRRC (Stage 1B) was notified to DPE in accordance with A11 and A12. Observation: The Bitumen Products Facility (BPF) had not been constructed at the time of the audit and Downer advised the auditor that it has not short term plans to construct it. The notifications submitted to the Department in relation to commencement of construction and operations of the DSRRC do not advise of the exclusion from construction and operation of the DSRRC's BPF or any consideration about staging the BPF. Recommendation: Notify the Department that the DSRRC's Bitumen Products Facility (BPF) has not been constructed and that Downer has no plans to construct it in the near future. If Downer decides to construct the BPF, assess and identify the consent implications of developing the BPF in consultation and agreement with DPE (eg. validity of consent after 5 years, simultaneous construction and operational activities, etc).	Compliant
EVIDENCE OF CONSULTATION				
A13	Where conditions of this consent require consultation with an identified party, the Applicant must: <ul style="list-style-type: none"> (a) consult with the relevant party prior to submitting the subject document to the Planning Secretary for approval; and (b) provide details of the consultation undertaken including: <ul style="list-style-type: none"> (ii) the outcome of that consultation, matters resolved and unresolved; and (iii) ii. details of any disagreement remaining between the party consulted and the Applicant and how the Applicant has addressed the matters not resolved. 	Construction Environmental Management Plan (CEMP) Rev 5, 5/02/2021, Downer Annex E of CEMP – Construction Traffic and Pedestrian Management Plan (CTPMP) Rev 1, 1/02/2021, Element Environment Flood Emergency Response Plan (FERP) Rev 2.0 3/02/2021, Molino Stewart	Evidence of consultation: CTPMP – sighted consultation with TfNSW 18/01/2021 FERP – sighted consultation 21 and 27 January 2021 attended representative from NSWSES (Peter Cinque, Shelly Stingmore & Jacqueline Kenner), rep from Downer and Molino Stewart's principals.	Compliant

	(g) if necessary, detail procedures for notifying residents and the community (including local schools), of any potential disruptions to routes.			
B31	The Applicant must: <ul style="list-style-type: none"> (a) not commence construction until the CTPMP required by condition B30 is approved by the Planning Secretary; and (b) implement the most recent version of the CTPMP approved by the Planning Secretary for the duration of construction. 	<p>Construction Environmental Management Plan (CEMP) Rev 5, 5/02/2021, Downer – Annex E</p> <p>Annex E of CEMP – Construction Traffic and Pedestrian Management Plan (CTPMP) Rev 1, 1/02/2021, Element Environment</p> <p>Letter 16/02/2021 DPE-EE re: DPE approval of CTPMP.</p> <p>Construction commenced 25/02/2021 (EE correspondence to DPE dated 12/02/2021)</p>	<p>The CTPMP was prepared and approved by the Department on 16/02/2021 prior to the commencement of construction.</p> <p>Implementation of CTPMP not possible given that the DSRCC is operational</p>	Compliant
Roadworks and Access				
New Access Road – Stage 3				
B32	Prior to the issue of a Subdivision Works Certificate for Stage 3, detailed engineering plans of the new access road, proposed as part of Stage 3 are to be submitted to Council's Traffic and Transport Manager for consideration by the Parramatta Traffic Committee and approval by Council. The construction of the proposed road is to be carried out by the Applicant with all associated costs to be paid for by the Applicant.		The new Access Road – Stage 3 - to the CSIE site is not within the DSRRC. Subdivision works and activities undertaken by the Applicant VE Property Pty Ltd	Not triggered
B33	Prior to the release of the Subdivision Certificate for Stage 3, the Applicant must complete the construction of the access road described in condition B32 to the satisfaction of the relevant roads authority. The Applicant must obtain approval for the works under section 138 of the Roads Act 1993.		As above	Not triggered
B34	Prior to any dedication, the Applicant must ensure that the construction of the road has been completed to the satisfaction of the relevant roads authority.		As above	Not triggered
Parking – DSRRC				
B35	The Applicant must provide sufficient parking facilities on-site for the DSRRC, including for heavy vehicles and for site personnel, to ensure that traffic associated with the development does not utilise public streets.	<p>Operational Environmental Management Plan (OEMP) Rev 4, 25/01/2022, Downer – Section 7.3, Table 7.2 and Annex B Site Layout</p> <p>Site inspection on 20/07/23</p>	<p>OEMP under Section 7.3, Table 7.2 and Annex B Site Layout provides sufficient parking facilities on site for DSRRC during operation.</p> <p>Public street parking by site vehicles was not observed during the site inspection on 20/07/23</p>	Compliant
Operating Conditions - DSRRC				
B36	The Applicant must ensure at the DSRRC that: <ul style="list-style-type: none"> (a) internal roads, driveways and parking (including grades, turn paths, sight distance requirements, aisle widths, aisle lengths and parking bay dimensions) associated with the development are constructed and maintained in accordance with the latest version of AS 2890.1:2004 Parking facilities Off-street car parking (Standards Australia, 2004), AS 2890.2:2018 Parking facilities Off-street commercial vehicle facilities (Standards Australia, 2018) and AS 2890.6:2009 Parking facilities Off-street parking for people with disabilities (Standards Australia, 2009) (b) the swept path of the longest vehicle entering and exiting the site, as well as manoeuvrability through the site, is in accordance with the relevant AUSTRROADS guidelines; 	<p>Operational Environmental Management Plan (OEMP) Rev 4, 25/01/2022, Downer – Section 7.3, Table 7.2 and Annex B Site Layout</p> <p>Civil Design Certification 9 Devon Street Rosehill, Costin Roe Consulting, dated 22/2/2022</p>	<p>Costin Roe Consulting's Civil Design Certification dated 22/2/2022 certified that the civil engineering design has been completed in accordance with SSD10459 including Condition B22 and B36 and the City of Parramatta Council Development Engineering Standards.</p> <p>The OEMP and Annex B provides a site layout that addresses the requirements under this condition.</p>	Compliant

Unique ID	Compliance requirement	Evidence collected	Independent Audit findings and recommendations	Compliance Status
	(c) the development does not result in any vehicles queuing on the public road network; (d) heavy vehicles and bins associated with the development are not parked on local roads or footpaths in the vicinity of the site; (e) all vehicles are wholly contained on site before being required to stop; (f) all loading and unloading of materials is carried out on-site; (g) all trucks entering or leaving the site with loads have their loads covered and do not track dirt onto the public road network; and (h) the proposed turning areas in the car park are kept clear of any obstacles, including parked cars, at all times.	Civil Design Certification 9 Devon Street Rosehill, Costin Roe Consulting, dated 25/2/2021 Site inspection on 20/07/23 Swept paths Drawing ptc-011 (rev 1, 18/12/20) and ptc-12 (rev 1, 18/12/20) ptc consultants	During the site inspection on 20/07/2023 no site vehicles were observed parked on local roads, vehicles were observed contained on site before stopping, no queuing was observed on the public road, all loading/unloading was observed occurring on site, all trucks were observed with the load covered and on-site turning areas were observed clear of obstacles. Note: WolfPeak considers that it is the role of the Certifier or other authority / expert to verify compliance under this condition	
HAZARDS AND RISK – DSRRC				
B37	Dangerous goods, as defined by the Australian Dangerous Goods Code, must be stored and handled strictly in accordance with: (a) all relevant Australian Standards; (b) for liquids, a minimum bund volume requirement of 110% of the volume of the largest single stored volume within the bund; and (c) the Environment Protection Manual for Authorised Officers: Bunding and Spill Management – technical bulletin (EPA, 1997). In the event of an inconsistency between the requirements of part (a) to (c), the most stringent requirement must prevail to the extent of the inconsistency.	Operational Environmental Management Plan (OEMP) Rev 4, 25/01/2022, Downer, Table 7.2 Incident Management Plan, Appendix K of OEMP Downer Manifest Site Plan dated 15/11/2021 with location of DG Depots Site inspection on 20/7/23	OEMP Rev 4 addresses DG storage requirements. Downer Manifest Site Plan dated 15/11/2021 with location of DG Depots (19 depots located on site) Site inspection on 20/07/2023 included some of the DG depots, which were observed all self-bunded, clearly identified in signage and labelled with required DG types.	Compliant
B38	The development must not result in the non-compliance of any existing dangerous goods fuel and gas pipelines in accordance with AS2885 Pipelines – Gas and Liquid Petroleum.		Downer advised that there are no fuel and gas main pipelines through the site, just connection to gas main located outside the site. Title of Lot 6 DP 1271928 does not show fuel and gas easements through the site	Not triggered
ABORIGINAL HERITAGE				
Unexpected Finds Protocol				
B39	If any item or object of Aboriginal heritage significance is identified on site: (a) all work in the immediate vicinity of the suspected Aboriginal item or object must cease immediately; (b) a 10 m wide buffer area around the suspected item or object must be cordoned off; and (c) Heritage NSW must be contacted immediately.	Construction Environmental Management Plan (CEMP) Rev 4, 1/02/2021, Downer – Annex G Contingency Management Plan and Aboriginal heritage unexpected finds protocol in Section 7.2 of CEMP	Downer advised the auditor no unexpected aboriginal heritage finds were found during construction	Not triggered
B40	Work in the immediate vicinity of the Aboriginal item or object may only recommence in accordance with the provisions of Part 6 of the National Parks and Wildlife Act 1974.	Construction Environmental Management Plan (CEMP) Rev 5, 5/02/2021, Downer – Annex G Contingency Management Plan	Downer advised the auditor no unexpected aboriginal heritage finds were found during construction	Not triggered
HISTORIC HERITAGE				
Unexpected Finds Protocol				

Unique ID	Compliance requirement	Evidence collected	Independent Audit findings and recommendations	Compliance Status
B41	If any archaeological relics are uncovered during the course of the work, then all works must cease immediately in that area. Unexpected finds must be evaluated and recorded and, if necessary, excavated by a suitably qualified and experienced expert in accordance with the requirements of Heritage NSW.	Construction Environmental Management Plan (CEMP) Rev 4, 1/02/2021, Downer – Annex G Contingency Management Plan and Historic heritage unexpected finds protocol in Section 7.2 of CEMP	Downer advised the auditor no archaeological relics were found during construction	Not triggered
WASTE MANAGEMENT				
Waste Monitoring Program – DSRRC Site				
B42	<p>From the commencement of operation of the DSRRC, the Applicant must implement a Waste Monitoring Program for the development. The program must:</p> <ul style="list-style-type: none"> (a) be prepared by a suitably qualified and experienced person(s) prior to the commencement of operation; (b) include suitable provision to monitor the: <ul style="list-style-type: none"> i. quantity, type and source of waste received on site; and ii. quantity, type and quality of the outputs produced on site; and (c) ensure that: <ul style="list-style-type: none"> i. all waste that is controlled under a tracking system, has the appropriate documentation prior to acceptance at the site; and ii. staff receive adequate training in order to be able to recognise and handle any hazardous or other prohibited waste including asbestos. 	<p>Operational Environmental Management Plan (OEMP) Rev 4, 25/01/2022, Downer – Section 7.6 Waste Monitoring, 7.5 Waste Management</p> <p>DPE approval of OEMP Rev 4 in correspondence dated 4/02/2022</p> <p>Downer on-line waste and product electronic tracking system</p> <p>EPL 21611</p> <p>Training records (refer to Condition A20)</p> <p>RREs:</p> <ul style="list-style-type: none"> • Downer Sand and Aggregate Exemption 2022 • Downer bituminous pavement order 2020 • The reclaimed asphalt pavement exemption 2014 <p>Sampling and Testing Procedure Rosehill Reconomy Plant, Downer 15/05/23</p> <p>Organic Sampling and Testing Procedure Rosehill Reconomy Plant, Downer 15/05/23</p> <p>Certificate of Analysis 316457, Envirolab, dated 15/02/2023, 2 asphalt samples tested for coal tar</p> <p>SGS Analytical Report SE237868 RO, 17/10/22, & SGS Chain of Custody & Analysis Request, 17/10/22 (asbestos, TRHs, PAHs, Metals)</p> <p>SGS Statement of QA/QC Performance SE237868 RO, 17/10/22</p> <p>Site inspection on 20/07/2023</p>	<p>A Waste Monitoring Program is incorporated in the OEMP under Section 7.6 and includes:</p> <ul style="list-style-type: none"> a. Section 7.6 b. i. Section 7.6.1 b. ii. Section 7.6.2 c. i. Section 7.6.1 c. ii. Section 8.3 <p>Note that waste is also regulated by the site EPL 21611. All waste received on site (identified in the OEMP and EPL 21611) and removed from site are weighted on the site weighbridges. All vehicles are directed to the weighbridges upon arrival or departure. Records are kept electronically in Downer's tracking system (which was shown to the auditor during the on site audit) and which provides details for each individual load (date/time, source/customer, source address, type, tonnage).</p> <p>The Sampling and Testing Procedure Rosehill Reconomy Plant, Downer 15/05/23, and Organic Sampling and Testing Procedure Rosehill Reconomy Plant, Downer 15/05/23 provide the processes for identifying and sampling suspected contaminated waste loads.</p> <p>All loads are inspected, and if a load suspected of coal tar or other contamination (e.g. asbestos), the material is quarantined and tested. Analytical results were provided to the auditor.</p> <p>Each arriving load (quarry) has a delivery docket with information about source and type of material</p> <p>Personnel training is provided (refer to Condition A20)</p>	Compliant

Downer has not submitted a copy of OEMP Rev 5 to DPE. Downer advised that its EMS requires annual updates of management plans. Downer advised that the OEMP Rev 5 updated contact details, Downer standards, addresses, emergency contact details, but mitigation measures remain as per OEMP Rev 4. The auditor review of the OEMP indicates that Rev 5 appears to contain the same mitigation as Rev 5. Refer to Observation under C5.</p>	Not triggered
REPORTING AND AUDITING				
Incident Notification, Reporting and Response				
C10	The Planning Secretary must be notified in writing via the Major Projects website immediately after the Applicant becomes aware of an incident. The notification must identify the development (including the development application number and the name of the development if it has one) and set out the location and nature of the incident. Subsequent notification requirements must be given, and reports submitted in accordance with the requirements set out in Appendix 3.	<p>Site interviews</p> <p>Review of project records</p>	No notifiable incidents have been reported since commencement of operations	Compliant
Non-Compliance Notification				
C11	The Planning Secretary must be notified in writing via the Major Projects website within seven days after the Applicant becomes aware of any non-compliance.		<p>Non-compliance: The non-compliance with Condition C16 regarding the timing of the first independent audit was not reported to the Planning Secretary within 7 days of becoming aware of the non-compliance</p> <p>Recommendation: Retrospectively notify the Department of the non-compliance with Condition C16</p>	Non-compliant
C12	A non-compliance notification must identify the development and the application number for it, set out the condition of consent that the development is non-compliant with, the way in which it does not comply and the reasons for the non-compliance (if known) and what actions have been, or will be, undertaken to address the non-compliance.			Not triggered
C13	A non-compliance which has been notified as an incident does not need to also be notified as a non-compliance.			Not triggered
Compliance Reporting - DSRRC				

Unique ID	Compliance requirement	Evidence collected	Independent Audit findings and recommendations	Compliance Status
C14	<p>Within three months after the first year of commencement of operation of the DSRRC, and in the same month each subsequent year (or such other timing as agreed by the Planning Secretary), the Applicant must submit a Compliance Report to the Planning Secretary reviewing the environmental performance of the development to the satisfaction of the Planning Secretary. Compliance Reports must be prepared in accordance with the Compliance Reporting Post Approval Requirements (Department 2020) and must also:</p> <p>(a) identify any trends in the monitoring data over the life of the development;</p> <p>(b) identify any discrepancies between the predicted and actual impacts of the development, and analyse the potential cause of any significant discrepancies; and</p> <p>(c) describe what measures will be implemented over the next year to improve the environmental performance of the development</p>		Compliance Report due no later than 12 August 2023 (operations commenced 12 May 2022)	Not triggered
C15	The Applicant must make each Compliance Report publicly available no later than 60 days after submitting it to the Planning Secretary and notify the Planning Secretary in writing at least 7 days before this is done.			Not triggered
Independent Audit - DSRRC				
C16	<p>Within one year of the commencement of operations of the DSRRC, and every three years after, unless the Planning Secretary directs otherwise, the Applicant must commission and pay the full cost of an Independent Environmental Audit (Audit) of the development. Audits must:</p> <p>(a) be prepared in accordance with the Independent Audit Post Approval Requirements (Department 2020)</p> <p>(b) be led and conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Planning Secretary; and</p> <p>(c) be submitted to the satisfaction of the Planning Secretary within three months of commissioning the Audit (or within another timeframe agreed by the Planning Secretary)</p>		<p>Non-Compliance: The First Independent Audit was commissioned more than a year after commencement of operations on the 12/5/22</p> <p>Recommendation: in future audits, ensure that the Independent Environmental Audit is undertaken within the timeframes of C16</p>	Non-compliant
C17	<p>In accordance with the specific requirements in the Independent Audit Post Approval Requirements (Department 2020), the Applicant must:</p> <p>(a) review and respond to each Independent Audit Report prepared under condition C16 of this consent;</p> <p>(b) submit the response to the Planning Secretary and any other NSW agency that requests it, together with a timetable for the implementation of the recommendations;</p> <p>(c) implement the recommendations to the satisfaction of the Planning Secretary; and</p> <p>(d) make each Independent Audit Report and response to it publicly available no later than 60 days after submission to the Planning Secretary and notify the Planning Secretary in writing at least 7 days before this is done.</p>		This is the first independent audit.	Not triggered
Monitoring and Environmental Audits				
C18	<p>Any condition of this consent that requires the carrying out of monitoring or an environmental audit, whether directly or by way of a plan, strategy or program, is taken to be a condition requiring monitoring or an environmental audit under Division 9.4 of Part 9 of the EP&A Act. This includes conditions in respect of incident notification, reporting and response, non-compliance notification, compliance reporting and independent auditing.</p> <p>Note: For the purposes of this condition, as set out in the EP&A Act, "monitoring" is monitoring of the development to provide data on compliance with the consent or on the environmental impact of the development, and an "environmental audit" is a periodic or particular documented evaluation of the development to provide information on compliance with the consent or the environmental management or impact of the development.</p>	<p>Review of records under this audit.</p> <p>Interview with auditees</p> <p>Site inspection on 20/07/2023</p>	<p>Division 9.4 of Part 9 of the EP&A Act relates to (among other things) the need to be accurate, true (not misleading), properly conducted (approved methodology, calibrated etc.), and with records retained.</p> <p>No notifiable incidents have occurred during the audited period. APPENDIX B – PLANNING SECRETARY AGREEMENT OF INDEPENDENT AUDITORS

Department of Planning and Environment

Mr Mark Roberts
Senior Environmental Scientist
Element Environment
25 Kingfisher Way
WARRIEWOOD NSW 2102

25/06/2023

Dear Mr Roberts

**Central Sydney Industrial Estate and DSRR (SSD-10459)
First Independent Environmental Auditor Nomination Request**

I refer to your request (SSD-10459-PA-32) for the Planning Secretary's approval of suitably qualified persons to prepare and undertake the first Independent Environmental Audit (IEA) for the Central Sydney Industrial Estate and Downer Sustainable Road Resource Centre (**project**), SSD-10459 as modified (**consent**).

The Department of Planning and Environment (**Department**) has reviewed the nominations and information you have provided and is satisfied that these experts are suitably qualified and experienced. Consequently, I can advise that the Secretary approves the appointment of the nominated audit team below to prepare and undertake the first IEA and report.

In accordance with Condition C16 of the consent and the *Independent Audit Post Approval Requirements (2020)* (**IAPAR**), the Secretary has agreed to the following audit team from Wolfpeak:

- Ana Maria Munoz – lead auditor,
- Derek Low – auditor; and
- Ricardo Prieto-Curie – alternate auditor.

Please ensure this correspondence is appended to the IEA report.

The Independent Audit must be prepared, undertaken and finalised in accordance with Conditions C16 and C17 of the consent, and the IAPAR. Failure to meet these requirements will require revision and resubmission.

Notwithstanding the agreement for the above-listed audit team for this first IEA, each subsequent IEA under the consent and IAPAR requires a request for the re-endorsement of the existing audit team, or a request for agreement to a revised audit team to be submitted to the Department for consideration of the Secretary. Each request is reviewed and depending on the complexity of the project, the suitability of the proposed team will be considered.

Should you wish to discuss the matter further, please contact Astrid Christensen, Compliance Officer, on (02) 9274 6170 or email compliance@planning.nsw.gov.au

Department of Planning and Environment

Yours sincerely

Rob Sherry
Team Leader Compliance - Government Projects
Compliance

As nominee of the Planning Secretary

APPENDIX D – CONSULTATION RECORDS

From: Ricardo Prieto-Curiel <rprietocuriel@wolfpeak.com.au>
Sent: Friday, 7 July 2023 10:24 AM

paul.sherry@downergroup.com
Subject: Downer Sustainable Road Resource Centre (DSRRC) (SSD-10459) - Independent Environmental Audit No. 1 (operation)

Dear Sir/Madam,

I am one of the Department of Planning and Environment (the Department) approved independent auditors on SSD-10459 (the Central Sydney Industrial Estate and Downer Sustainable Road Resource Centre (DSRRC) or the Project).

We are currently preparing to undertake the first independent environmental audit (IEA) of the Project's operations. The audit is required to be conducted in accordance with SSD-10459 Schedule 2 Condition C16, and the Department's 2020 *Independent Audits Post Approval Requirements* (or IAPAR).

The consent, as modified (MOD1), is available at the following link: <https://majorprojects.planningportal.nsw.gov.au/prweb/PRRestService/mp/01/getContent?AttachRef=SSO-10459-MOD-1%2120211121T214054.786%20GMT>

The IAPAR is available at the following link: <https://www.planning.nsw.gov.au/-/media/Files/DPE/Other/Assess-and-regulate/About-Compliance/independent-audit-post-approval-requirements-2020-05-19.pdf>

In accordance with Section 3.2 of the IAPAR, I am consulting with the Department on the scope of the audit and for confirmation as to whether other parties or agencies are to be consulted.

As you will see the required scope (outlined in Section 3.3 of the IAPAR) already covers an assessment of each relevant condition along with all post approval documents prepared to satisfy the conditions of Approval, including an assessment of the implementation of Environmental Management Plans and Sub-plans, complaints, incidents and so forth. These are included in the audit scope for this Project.

In providing input to the scope, I kindly request the Department to confirm:

- If it has any concerns/key issues it would like examined, relating to post-approval requirements and compliance that are not already called up by the scope in Section 3.3 of the IAPAR, or
- If it recommends that other parties or agencies are to be consulted. If so, I request that the Department identify those parties.

We would appreciate your early response on this matter to allow us to plan for the on-site component of the audit and any additional consultation that may be requested by the Department.

Please let me know if you have any questions. I look forward to hearing from you.

Kind regards,

Ricardo

Subject: RE: Downer Sustainable Road Resource Centre (DSRRC) (SSD-10459) - Independent Environmental Audit No. 1 (operation)

Good afternoon Ricardo,

Thank you for your email seeking consultation into the first IEA for Downer Sustainable Road Resource Centre (DSRRC) (SSD-10459).

The Department has no comment in relation to the proposed scope that is not captured by the Consent, including Schedule 2 Condition C16 and the Department's Independent Audit Post Approval Requirements (May 2020).

The Department does request that you also consult with the City of Parramatta Council.

Please annex a copy of this email to the final report as evidence of consultation.

Kind regards,

Astrid Christensen
Compliance Officer

Subject: Downer Sustainable Road Resource Centre (DSRRC) (SSD-10459) - Independent Environmental Audit No. 1 (operation)

[EXTERNAL EMAIL] stop and think before opening attachments, clicking on links or responding.

Dear Sir/Madam,

I am one of the Department of Planning and Environment (the Department) approved independent auditors on SSD-10459 (the Central Sydney Industrial Estate and Downer Sustainable Road Resource Centre (DSRRC) or the Project).

We are currently preparing to undertake the first independent environmental audit (IEA) of the Project's operations. The audit is required to be conducted in accordance with SSD-10459 Schedule 2 Condition C16, and the Department's 2020 *Independent Audits Post Approval Requirements* (or IAPAR).

The consent, as modified (MOD1), is available at the following link: <https://majorprojects.planningportal.nsw.gov.au/prweb/PRRestService/mp/01/getContent?AttachRef=SSD-10459-MOD-1%2120211121T214054.786%20GMT>

The IAPAR is available at the following link: <https://www.planning.nsw.gov.au/-/media/Files/DPE/Other/Assess-and-regulate/About-Compliance/independent-audit-post-approval-requirements-2020-05-19.pdf>

In accordance with Section 3.2 of the IAPAR, we have consulted with the Department on the scope of the audit and seeking confirmation as to whether other parties or agencies needed to be consulted. In its response, the Department has requested that we consult with the **City of Parramatta Council** on the scope of the audit (refer to the email from the Department below). We kindly request your input on any key issues relating to post-approval requirements and compliance, or concerns in relation to the project activities that are not already called up by the scope in Section 3.3 of the IAPAR. As required under Section 3.3 of the IAPAR, the audit already covers an assessment of each relevant condition along with all post approval documents prepared to satisfy the conditions of Approval, including an assessment of the implementation of Environmental Management Plans and Sub-plans, complaints, incidents and so forth

We would appreciate your early response on this matter to allow us to plan for the on-site component of the audit and further progress the audit activities.

Please let me know if you have any questions. I look forward to hearing from you.

Dear Sir/Madam,

Further to my email on Friday 7/7/23, please note that the on-site audit activities at the DSRRC will be undertaken on Thursday 20/7/23. As indicated on the 7/7/23, the Department of Planning and Environment (the Department) has requested that we consult with the **City of Parramatta Council** on the scope of the audit (refer to the email from the Department below). We kindly request your input on any key issues relating to post-approval requirements and compliance, or concerns in relation to the project activities that are not already called up by the scope in Section 3.3 of the Department's 2020 Independent Audits Post Approval Requirements (IAPAR). As required under Section 3.3 of the IAPAR, the audit already covers an assessment of each relevant condition along with all post approval documents prepared to satisfy the conditions of Approval, including an assessment of the implementation of Environmental Management Plans and Sub-plans, complaints, incidents and so forth. Your early response on this matter would be appreciated.

In the foreground, there are several clumps of tall, green grasses. A black fence with a chain-link base and a top section of three strands of white plastic-coated wire runs across the middle ground. Behind the fence, there is a dense line of trees and shrubs, including some yellow-flowered trees. The sky is clear and blue.</p>

APPENDIX G – DECLARATION FORM

Declaration of Independence - Auditor

Project Name:	Downer Sustainable Road Resource Centre IEA
Consent Number:	SSD-10459
Description of Project:	Operation of a combined asphalt plant, reclaimed asphalt pavement (RAP) facility, bitumen products plant and a road waste sweepings recycling facility (Reconomy) on proposed Lot 6.
Project Address:	Lot 100 DP 1168951 9 Devon Street, Rosehill
Proponent:	VE Property Pty Ltd (Applicant of SSD-10459) / Downer (construction and operation of the DSRRC)
Title of Audit:	Downer Sustainable Resource Road Centre
Date:	2 August 2023

I declare that I have undertaken the Independent Audit and prepared the contents of the attached Independent Audit Report and to the best of my knowledge:

- i. the audit has been undertaken in accordance with relevant condition(s) of consent and the **Independent Audit Post Approval Requirements (Department 2020)**;
- ii. the findings of the audit are reported truthfully, accurately and completely;
- iii. I have exercised due diligence and professional judgement in conducting the audit;
- iv. I have acted professionally, objectively and in an unbiased manner;
- v. I am not related to any proponent, owner or operator of the project neither as an employer, business partner, employee, or by sharing a common employer, having a contractual arrangement outside the audit, or by relationship as spouse, partner, sibling, parent, or child;
- vi. I do not have any pecuniary interest in the audited project, including where there is a reasonable likelihood or expectation of financial gain or loss to me or spouse, partner, sibling, parent, or child;
- vii. neither I nor my employer have provided consultancy services for the audited project that were subject to this audit except as otherwise declared to the Department prior to the audit; and
- viii. I have not accepted, nor intend to accept any inducement, commission, gift or any other benefit (apart from payment for auditing services) from any proponent, owner or operator of the project, their employees or any interested party. I have not knowingly allowed, nor intend to allow my colleagues to do so.

Notes:

- a) Under section 10.6 of the *Environmental Planning and Assessment Act 1979* a person must not include false or misleading information (or provide information for inclusion in) in a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is false or misleading in a material respect. The proponent of an approved project must not fail to include information in (or provide information for inclusion in) a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is materially relevant to the monitoring or audit. The maximum penalty is, in the case of a corporation, \$1 million and for an individual, \$250,000; and
- b) The *Crimes Act 1900* contains other offences relating to false and misleading information: section 307B (giving false or misleading information – maximum penalty 2 years imprisonment or 200 penalty units, or both)
